

WIRELESS HEADSET FULL DUPLEX SERIE DECT

Serie DECT wireless headset

**Base station with
gooseneck**

**DECT-8/PR-07004 Communication
box up to max. 8 headsets**

FEATURES AND BENIFITS

- Noise-cancelling microphone allows communication even in high noise areas.
- Soft earcups reducing ambient noise up to 23 dB.
- No external antennas.
- Maximum distance 50 meter (steel structure) to 200 meter. (Open area)
- Exist as Person to person communication (one set) or as multi-man system up to eight (8) headsets at the same time using the communication box. Use extension box up to 12 users.

OPTION

- Hardhat brackets for use with hardhat
- Interface to Page/Party wired intercom system.

The Serie DECT wireless headsets provides “man to man” communication in full duplex. (Meaning speak and listen at the same time. No push to talk button).

If you work in high noise, or need to be hands-free around your production line, the series DECT are the best choice.

Adding the audio interface will allow you to connect this DECT wireless system to a wired industrial intercom system up to 1,6Km away. See Pub-0003-016.
